Formal Education

Amity University, Mumbai Panvel, Navi Mumbai

Bachelor of Science (B.Sc.) Information Technology, Secondary Field in French and Political Science July. 2025

- **Relevant Coursework**: Software Engineering, Public Speaking, Data Structures with C++, Operating Systems, Introduction to Machine Learning, Business Intelligence, Cloud Computing (Azure & AWS), Java, DBMS

Experiences

Digital Systems & Growth Lead Sept. 2023 – Sept. 2024

Multi-Channel Portfolio *Mumbai, MH*

- Scaled a multi-channel digital portfolio to **2M+** aggregate views by leveraging data-driven SEO, metadata schemas, and targeted technical content deployment.
- Leveraged Generative AI for automated asset production across both platforms, reducing time-to-market for new content by **50%**

Projects

daljeetsingh.me/#/projects

Janus | *Golang, IP Blocking, Docker, AI Scraper Mitigation, TLS Fingerprinting, HTML* — Aug. 2024 - Sept. 2025

Bot Mitigation & Traffic Analysis Engine

- **Engineered Go-based middleware** for automated bot detection using **multi-signal scoring** (TLS fingerprinting, geo-IP reputation, browser fingerprinting, rate limiting)
- Implemented hybrid Proof-of-Work challenge system with **JWT authentication**, reducing false positives while **maintaining sub-100ms latency** for verified users
- Built **RESTful API** with two core endpoints handling fingerprint ingestion, challenge generation, and verification.

Hull Tactical Market Prediction | *LightGBM, Polars, Scikit-learn, Joblib, ONNX, PyTorch* — Sept – Dec. 2025

Developed an ensemble machine learning system to predict S&P 500 excess returns.

- **Built high-performance feature engineering pipeline** using Polars for on-the-fly feature generation, processing 200+ financial indicators (economic, price, volume, sentiment, momentum, derivatives, intermarket metrics)
- **Engineered 500+ derived features** including lag features (1-3 periods), rolling statistics (5-day, 21-day windows), and group-level aggregations across 8 market categories
- **Implemented stateful rolling buffer system** with deque data structures maintaining 252-day historical context, enabling chronological time-series predictions without data leakage

Research Work

Research Publication: June. 2024 – Present

"Enhancing Accessibility through Real-Time Scene Understanding & Navigation for Visually Impaired"

First Author, Published on TechRxiv.org (Preprint Server) | DOI: 10.22541/au.176843166.60388360/v1

Co-authored with Dr. Narayan Kulkarni, Assistant Professor, Amity Institute of Information Technology (AIIT)

- Developed a **dual-stream deep learning framework** combining SSD-VGG16 and CRNN for real-time object detection and text recognition, **optimized for resource-constrained** mobile devices.
- Validated system performance on 1,000+ real-world images across diverse lighting and environmental conditions, demonstrating **practical applicability for assistive navigation**.

Skills

Programming: C/C++, Python, SQL, Bash, Java, Golang, HTML, CSS
Databases: PostgreSQL, MongoDB
Frameworks/Libraries: Fast API, REST API, Node.js
DevOps Tools: Docker, GitHub Actions, Git, Linux/Unix, CI/CD Pipelines
